

CLINICAL AND VACCINE IMMUNOLOGY

Volume 14

June 2007

No. 6

MINIREVIEW

Frequency, Causes, and New Challenges of Indeterminate Results in Western Blot Confirmatory Testing for Antibodies to Human Immunodeficiency Virus

Ming Guan

649–659

VACCINE RESEARCH

Ten-Year Surveillance of Pneumococcal Infections in Temuco, Chile: Implications for Vaccination Strategies

Jaime Inostroza, Vijna Illesca, Patricia Reydet, Ana Maria Vinet, Gonzalo Ossa, Sergio Muñoz, Terry Thompson, and Ricardo U. Sorensen

660–664

Fruit-Specific Expression of the Human Immunodeficiency Virus Type 1 Tat Gene in Tomato Plants and Its Immunogenic Potential in Mice

Yuri Jorge Peña Ramírez, Ennio Tasciotti, Abel Gutierrez-Ortega, Alberto J. Donayre Torres, María Teresa Olivera Flores, Mauro Giacca, and Miguel Ángel Gómez Lim

685–692

Cellular and Humoral Immune Responses to Alphavirus Replicon Vaccines Expressing Cytomegalovirus pp65, IE1, and gB Proteins

Elizabeth A. Reap, Sergey A. Dryga, John Morris, Bryan Rivers, Pamela K. Norberg, Robert A. Olmsted, and Jeffrey D. Chulay

748–755

Immune Responses Induced by Replication-Defective Adenovirus Expressing the C-Terminal Portion of the *Mycoplasma hyopneumoniae* P97 Adhesin

F. R. Okamba, E. Moreau, K. Cheikh Saad Bouh, C. A. Gagnon, B. Massie, and M. Arella

767–774

Immunization with PspA Incorporated into a Poly(Ethylene Oxide) Matrix Elicits Protective Immunity against *Streptococcus pneumoniae*

Quincy C. Moore III, LaShundra Johnson, Michael Repka, and Larry S. McDaniel

789–791

Noninferiority of Antibody Response to Human Papillomavirus Type 16 in Subjects Vaccinated with Monovalent and Quadrivalent L1 Virus-Like Particle Vaccines

Suzanne M. Garland, Marc Steben, Mauricio Hernandez-Avila, Laura A. Koutsky, Cosette M. Wheeler, Gonzalo Perez, Diane M. Harper, Sepp Leodolter, Grace W. K. Tang, Daron G. Ferris, Mark T. Esser, Scott C. Vuocolo, Micki Nelson, Radha Railkar, Carlos Sattler, and Eliav Barr on behalf of the 012 Study Investigators

792–795

CELLULAR IMMUNOLOGY, ANTIBODIES, AND MEDIATORS OF IMMUNITY

Exocytosis of Neutrophil Formyl Peptide Receptor-Like 1 (fPRL1) Results in Downregulation of Cytoplasmic fPRL1 in Patients with Purulent Dermatitis

Eiji Ohara, Yoshitaka Kumon, Toshihiro Kobayashi, Hiroaki Takeuchi, and Tetsuro Sugiura

678–684

MICROBIAL IMMUNOLOGY

Kinetics of the Human Antibody Response against *Salmonella enterica* Serovars Enteritidis and Typhimurium Determined by Lipopolysaccharide Enzyme-Linked Immunosorbent Assay

Mette A. Strid, Tine Dalby, Kåre Mølbak, and Karen A. Krogh

741–747

Continued on following page

Transcriptional Activation of Interferon-Stimulated Genes but Not of Cytokine Genes after Primary Infection of Rhesus Macaques with Dengue Virus Type 1	Carlos A. Sariol, Jorge L. Muñoz-Jordán, Kristina Abel, Lymarie C. Rosado, Petraleigh Pantoja, Luis Giavedoni, Idia Vanessa Rodriguez, Laura J. White, Melween Martínez, Teresa Arana, and Edmundo N. Kraiselburd	756–766
Rational Peptide Selection To Detect Human Immunodeficiency Virus Type 1-Specific T-Cell Responses under Resource-Limited Conditions	C. B. Willberg, S. K. Pillai, E. R. Sharp, M. G. Rosenberg, J. D. Agudelo, J. D. Barbour, and D. F. Nixon	785–788
Age-Specific Salivary Immunoglobulin A Response to <i>Streptococcus mutans</i> GbpB	Ruchele D. Nogueira, Alessandra C. Alves, William F. King, Reginaldo B. Gonçalves, José F. Höfling, Daniel J. Smith, and Renata O. Mattos-Graner	804–807
VETERINARY IMMUNOLOGY		
Experimental Infection of Neonatal Foals with <i>Rhodococcus equi</i> Triggers Adult-Like Gamma Interferon Induction	Stephanie Jacks, Steeve Giguère, P. Cynda Crawford, and William L. Castleman	669–677
Milk and Serum J5-Specific Antibody Responses, Milk Production Change, and Clinical Effects following Intramammary <i>Escherichia coli</i> Challenge for J5 Vaccinate and Control Cows	David J. Wilson, Bonnie A. Mallard, Jeanne L. Burton, Ynte H. Schukken, and Yrjo T. Gröhn	693–699
Seroprevalence of Selected Infectious Agents in a Free-Ranging, Low-Density Lion Population in the Central Kalahari Game Reserves in Botswana	Sandra Ramsauer, Gert Bay, Marina Meli, Regina Hofmann-Lehmann, and Hans Lutz	808–810
CLINICAL AND DIAGNOSTIC LABORATORY IMMUNOLOGY		
Evaluation of an Enzyme Immunoassay for Detection of Immunoglobulin M Antibodies to West Nile Virus and the Importance of Background Subtraction in Detecting Nonspecific Reactivity	Mindy L. Rawlins, Erica M. Swenson, Harry R. Hill, and Christine M. Litwin	665–668
Production and Evaluation of Reagents for Detection of <i>Histoplasma capsulatum</i> Antigenuria by Enzyme Immunoassay	Mark D. Lindsley, Heather L. Holland, Sandra L. Bragg, Steven F. Hurst, Kathleen A. Wannemuehler, and Christine J. Morrison	700–709
Evaluation of the LIAISON Chemiluminescence Immunoassay for Diagnosis of Syphilis	Carrie S. Knight, Mary A. Crum, and Robert W. Hardy	710–713
Comparison of an ESAT-6/CFP-10 Peptide-Based Enzyme-Linked Immunospot Assay to a Tuberculin Skin Test for Screening of a Population at Moderate Risk of Contracting Tuberculosis	Esmail Porsa, Lee Cheng, and Edward A. Graviss	714–719
Rapid Detection of Hepatitis B Virus Surface Antigen by an Agglutination Assay Mediated by a Bispecific Diabody against Both Human Erythrocytes and Hepatitis B Virus Surface Antigen	Yu-Ping Chen, Yuan-Yuan Qiao, Xiao-Hang Zhao, Hong-Song Chen, Yan Wang, and Zhuozhi Wang	720–725
Single-Chain Antibody Fragment Specific for <i>Plasmodium vivax</i> Duffy Binding Protein	So-Hee Kim, Seung-Young Hwang, Yong-Seok Lee, In-Hak Choi, Sae-Gwang Park, and Weon-Gyu Kho	726–731
Treatment Failure Related to Intrathecal Immunoglobulin M (IgM) Synthesis, Cerebrospinal Fluid IgM, and Interleukin-10 in Patients with Hemolympathic-Stage Sleeping Sickness	Veerle Lejon, Jo Robays, François Xavier N'Siesi, Dieudonné Mumba, Annemie Hoogstoel, Sylvie Bisser, Hansotto Reiber, Marleen Boelaert, and Philippe Büscher	732–737

Performance of Two Commercial Immunochromatographic Assays for Rapid Detection of Antibodies Specific to Human Immunodeficiency Virus Types 1 and 2 in Serum and Urine Samples in a Rural Community-Based Research Setting (Rakai, Uganda)	S. C. Kagulire, P. D. Stamper, P. Opendi, J. L. Nakavuma, L. A. Mills, F. Makumbi, R. H. Gray, D. Serwadda, and S. J. Reynolds	738–740
Evaluation of a Simplified Dual-Platform Flow Cytometric Method for Measurement of Lymphocyte Subsets and T-Cell Maturation Phenotypes in the Population of Nouna, Burkina Faso	T. Böhler, M. von Au, N. Klose, K. Müller, B. Coulibaly, F. Nauwelaers, H. P. Spengler, G. Kynast-Wolf, and H.-G. Kräusslich	775–781
Immuno-hematological Reference Values for Healthy Adults in Burkina Faso	N. Klose, B. Coulibaly, D. M. Tebit, F. Nauwelaers, H. P. Spengler, G. Kynast-Wolf, B. Kouyaté, H.-G. Kräusslich, and T. Böhler	782–784
Extended Culture Enhances Sensitivity of a Gamma Interferon Assay for Latent <i>Mycobacterium tuberculosis</i> Infection	Ana Cehovin, Jacqueline M. Cliff, Philip C. Hill, Roger H. Brookes, and Hazel M. Dockrell	796–798
Evaluation of Two Rapid Immunochromatographic Assays for Diagnosis of Dengue among Vietnamese Febrile Patients	Tran Thi Thanh Nga, Khoa T. D. Thai, Hoang Lan Phuong, Phan Trong Giao, Le Quoc Hung, Tran Quang Binh, Vo Thi Chi Mai, Nguyen Van Nam, and Peter J. de Vries	799–801
Evaluation of the IMMY ALPHA <i>Histoplasma</i> Antigen Enzyme Immunoassay for Diagnosis of Histoplasmosis Marked by Antigenuria	Ann LeMonte, Lindsey Egan, Patricia Connolly, Michelle Durkin, and L. Joseph Wheat	802–803
Use of Protein-Specific Monoclonal Antibody-Based Latex Agglutination for Rapid Diagnosis of <i>Burkholderia pseudomallei</i> Infection in Patients with Community-Acquired Septicemia	Pattama Ekpo, Utane Rungpanich, Supinya Pongsunk, Pimjai Naigowit, and Vimom Petkanchanapong	811–812
