COVER IMAGE

Cover photograph: In this issue of *Clinical and Vaccine Immunology*, Schleiss and colleagues describe the generation of a candidate bivalent vaccine, consisting of subunit glycoprotein B and pp65 (GP83), based on a recombinant lymphocytic choriomeningitis virus (LCMV) vector, for prevention of congenital cytomegalovirus (CMV) infection. Vaccine constructs were generated both for human CMV and for guinea pig CMV (GPCMV). The image highlights GPCMV-induced pathology in the cochlea, a major target of infection (with attendant disabling hearing loss) in infants. The image ($\times 60$ magnification) demonstrates positive immunofluorescence staining in the spiral ganglion and scala vestibuli of a GPCMV-infected cochlea, using a GPCMV-specific monoclonal antibody targeting the GPCMV pp65 homolog. SPOTLIGHT

Articles of Significant Interest Selected from This Issue by the Editors e00535-16

COMMENTARIES

Congenital Cytomegalovirus: a “Now” Problem—No Really, Now e00491-16

David I. Bernstein

Trained Immunity and Susceptibility to HIV e00509-16

Steven C. Derrick

MINIREVIEWS

Multivalent and Multipathogen Viral Vector Vaccines e00298-16

Katharina B. Lauer, Ray Borrow, Thomas J. Blanchard

Contribution of Maternal Immunity to Decreased Rotavirus Vaccine Performance in Low- and Middle-Income Countries e00405-16

Katayi Mwila, Roma Chilengi, Michelo Simuyandi, Sallie R. Permar, Sylvia Becker-Dreps

VACCINES

Additive Protection against Congenital Cytomegalovirus Conferred by Combined Glycoprotein B/pp65 Vaccination Using a Lymphocytic Choriomeningitis Virus Vector e00300-16

Mark R. Schleiss, Ursula Berka, Elizabeth Watson, Mario Aistleithner, Bettina Kiefmann, Bastien Mangeat, Elizabeth C. Swanson, Peter A. Gillis, Nelmary Hernandez-Alvarado, Claudia Fernández-Alarcón, Jason C. Zabeli, Daniel D. Pinschewer, Anders E. Lilja, Michael Schwendinger, Farshad Guirakhoo, Thomas P. Monath, Klaus K. Orlinger

Enhanced Protective Immunogenicity of Homodimeric *Borrelia burgdorferi* Outer Surface Protein C e00306-16

Diane G. Edmondson, Sabitha Prabhakaran, Steven J. Norris, Amy J. Ullmann, Joe Piesman, Marc Dolan, Christian Probst, Christiane Radzimski, Winfried Stöcker, Lars Komorowski

Balancing Trained Immunity with Persistent Immune Activation and the Risk of Simian Immunodeficiency Virus Infection in Infant Macaques Vaccinated with Attenuated *Mycobacterium tuberculosis* or *Mycobacterium bovis* BCG Vaccine e00360-16

Kara Jensen, Myra Grace dela Pena-Ponce, Michael Piatak, Jr., Rebecca Shoemaker, Kelli Oswald, William R. Jacobs, Jr., Glenn Fennelly, Carissa Lucero, Katie R. Mollan, Michael G. Hudgens, Angela Amedee, Pamela A. Kozlowski, Jacob D. Estes, Jeffrey D. Lifson, Koen K. A. Van Rompay, Michelle Larsen, Kristina De Paris

Comparisons of the Humoral and Cellular Immune Responses Induced by Live Attenuated Influenza Vaccine and Inactivated Influenza Vaccine in Adults e00414-16

Daniel F. Hoft, Kathleen R. Lottenbach, Azra Blazevic, Aldin Turan, Tamara P. Blevins, Thomas P. Pacatte, Yinyi Yu, Michelle C. Mitchell, Stella G. Hoft, Robert B. Belshe

Serum Bactericidal Antibody Responses of Adults Immunized with the MenB-4C Vaccine against Genetically Diverse Serogroup B Meningococci e00430-16

Serena Giuntini, Eduardo Lujan, Malick M. Gibani, Christina Dold, Christine S. Rollier, Andrew J. Pollard, Dan M. Granoff

The Live Attenuated Cholera Vaccine CVD 103-HgR Primes Responses to the Toxin-Coregulated Pilus Antigen TcpA in Subjects Challenged with Wild-Type *Vibrio cholerae* e00470-16
