Cover photograph: Effect on *Neisseria meningitidis* serogroup C capsular polysaccharide (MenC PS) shedding by bacteria colonizing human bronchial epithelial 16HBE14o- cells when treated with pooled, purified IgG from subjects before (left) and after (right) immunization with a MenC PS-protein conjugate vaccine. The bacteria were stained with fluorescence-labeled murine anti-porin PorA P1.2 (green) and anti-MenC PS (red) antibodies. (Photo courtesy of Vianca Vianzon, Beate Illek, and Gregory R.
